- Prevents fraud and misrepresentation.
- Maintains fairness and integrity in insurance transactions.
- If either party breaches this principle, the insurer may have grounds to void the policy or deny claims.

Explanation:

In practice, the insured must disclose all material facts, such as previous claims, health conditions, or risk factors, even if not directly asked. Conversely, the insurer must provide clear policy terms and disclose any significant exclusions or conditions.

Question 2: Differentiate between 'Risk' and 'Peril' with suitable examples.

Answer:

- Risk: The uncertainty regarding the occurrence of a loss or the chance of an event happening that could cause damage or loss. It is the potential for future loss.

Example: The possibility of a house catching fire or a car being stolen.

- Peril: The specific cause of a loss or damage.

Example: Fire, theft, flood, or earthquake.

Differentiation:

- Risk is the uncertainty about whether a loss will occur.
- Peril is the actual cause of the loss.

In practice:

Insurance policies often specify covered perils. For example, a homeowners policy might cover risks from fire and theft but exclude flood, which is a peril-specific exclusion.

Question 3: Explain the concept of 'Insurable Interest' and its significance in insurance contracts.

Answer:

Insurable Interest refers to the financial or legal stake that the insured has in the subject matter of insurance. It must exist at the time of insuring and at the time of loss.

Significance:

- Prevents insurance from becoming a form of gambling.
- Ensures that only those with a genuine interest in the subject can take out insurance on it.
- Validates the claim for compensation when a loss occurs.

Example:

- A homeowner has insurable interest in their property.
- A car owner has insurable interest in their vehicle.
- A creditor has insurable interest in the debtor's life if the loan is secured by life insurance.

Legal Aspects:

Without insurable interest, the contract may be considered void. The law requires that insurable interest exists to prevent moral hazard and encourage responsible behavior.

Question 4: What are the main features of a Fire Insurance Policy?

Answer:

Main Features:

- Coverage: Protects against damage or loss caused by fire, lightning, explosion, and sometimes additional perils like riots or natural calamities, depending on policy terms.
- Sum Insured: The maximum amount payable in case of a claim, agreed upon at policy inception.

- Premium: The amount paid by the insured for coverage, usually payable annually.
- Policy Period: The duration during which the coverage is active, typically one year.
- Exclusions: Specific perils or damages not covered, such as war damage or deliberate damage.
- Valuation Clause: Specifies how the loss will be assessed?whether on actual cash value or replacement cost.
- Deductibles: The amount the insured must bear before the insurer pays.
- Claim Procedure: Details the process for reporting and settling claims.

Additional Features:

- Extensions: Cover additional risks like sabotage or natural calamities, often at extra premium.
- Conditions: Conditions such as maintaining safety measures or providing access for inspection.

Significance:

Understanding these features helps the insured select appropriate coverage and ensures smooth claims processing.
